I would like to define myself as a person, who wants to keep growing, learn and adapt to the changes occurring around me either it is professionally or personally. I set my goals as a short term and through achieving this short term goals to achieve a major goal. I am a quick learner and love to work both as individual or in team.

EDUCATION

89%

Courses

- Science

Secondary

Holy Public School

04/2014 - 03/2015

10 CGPA

KEY PROJECTS

COVID TRACKER (Android Studio) (06/2020 - 06/2020)

- It allows you to get a track record of the total cases, active cases and number of life deceased in your district, state, India and even the information throughout the world.
- It will give you an ease of searching through name of the state or district you want to get informed. Also provided a news section which will keep you up to date for the new cases, recoveries and deaths in our country.

CONTEST DETAIL BOT (Python) (05/2020 - 05/2020)

- It is a Telegram bot which gives you daily contests on various coding platforms and user can enable notification to get notified half hour before every contest.

JARVIS (Python) (05/2019 - 05/2019)

- Python based robot with pre-programmed functionality to respond to user requests that aids in day to day work inspired from sci-fi movies.
- Smart enough to send Email to different contacts over voice command, uses pyttsx3 and speechrecognition module mainly

WORK EXPERIENCE

Software Engineer Intern

JPMorgan & Chase

06/2020 - 07/2020

Bengaluru, India

Achievements/Tasks

- Build an educational android app for under-privileged students keeping in mind customizability for the facilitators and interactiveness for students.
- Also used SCRUM for software development. As a side task we have worked on test driven development on Real Time Alerting System.
